

## Lukestone Care Home residents enjoy Wild Science animal therapy

**Wild Science came to Lukestone Care Home recently, to dazzle our residents and staff with their incredible animals.**

Wild Science provides hands-on **animal experiences** for all age groups across the UK and our ladies and gents enjoyed some animal therapy when they met **Clive the snake** and **Mango the bearded dragon**. Some of our ladies and gents touched, stroked and held them.

Everybody loved asking Katy **lots of questions about the animals** she brought in and it was fascinating to see everyone's reactions to them. The texture of Mango's skin and how smooth Clive's skin was were the most discussed topics.

*What incredible creatures!*
